BOARD FOR ARCHITECTS, PROFESSIONAL ENGINEERS,
PROFESSIONAL LAND SURVEYORS & PROFESSIONAL
LANDSCAPE ARCHITECTS

FALL/WINTER 2017

CHAIRMAN'S LETTER

By: Robert N. (Bob) Hartnett, PLA

In April, Governor Greitens signed Executive Order 17-11 creating a task force “to study all existing boards and commissions, determine whether each board and commission is necessary, effective, and efficient, and make recommendations that will improve and streamline the existing system.” The Governor’s task force consisted of 12 members and was co-chaired by the Lieutenant Governor and the Director of Boards and Commissions. The goals for the task force were:

- Evaluate the purpose and necessity of each existing board and commission;
- Determine the cost-effectiveness of each board and commission by considering their governmental, economic, and societal costs and benefits;
- Identify opportunities to eliminate or consolidate boards and commissions;
- Identify opportunities to modify the size, mission, and structure of boards and commissions;
- Identify opportunities to reduce barriers to entry in occupational licensing programs; and,

CHAIRMAN'S LETTER CONTINUED...

- f. Recommend comprehensive executive and legislative reform proposals to the Governor no later than October 31, 2017.

The [task force](#) began fact finding by conducting a survey of boards and commissions and having five public meetings. The survey was seeking information on board meeting frequency, amount of action items, revenue and expenses, and maybe most importantly, asking a question about identifying public safety components to the board. Our Board staff as well as staff from the Division of Professional Registration were very well prepared and were able to answer requests for information from the task force. At the time of this writing, the task force has issued a draft report, and the good news is that there are no recommended changes at this time for the structure of our Board.

Also contained in the task force report is a recommendation to "Pass legislation that would mandate an automatic fee reduction if funds reach two times more than their yearly/biennial budgets." I am

very proud of how our Board has managed its finances through my time on the Board. In the last 8 years, we have lowered individual licensees' biennial renewal fees from \$100 to \$35 and corporate biennial renewal fees from \$200 to \$50 by looking for efficiencies and cost saving measures. As one example, this electronic newsletter saves approximately \$76,000 in printing and mailing cost annually. In my conversations with other board members involved with NCARB, NCEES, or CLARB, I frequently hear from other boards that they are amazed at our low renewal fees. Our Board Members strongly believe in keeping our fees as low as possible while maintaining a healthy fund balance and saving for a rainy day in case of issues such as the Hyatt disaster in the early 1980's.

Please feel free to contact me through the Board office if I can be of any service to you.

NATIONAL COUNCILS

National Council of Architectural Registration Boards (NCARB)

National Council of Examiners for Engineering and Surveying (NCEES)

Council of Landscape Architectural Registration Boards (CLARB)

ARCHITECTURAL DIVISION LETTER

By: James C. (JC) Rearden, AIA, CSI, Division Chair

It is the responsibility of every licensed professional to know the laws and rules that govern his or her practice and yet, so often, our Board hears a defendant (when appearing before the Board in a hearing) offer the excuse that they were told to do it in the way that they were now defending. The direction is often claimed to have come from their colleagues (i.e., everyone does it that way), their client, or from a code enforcement authority. Such reasoning is not a good defense. The statutes and rules

are not difficult for a practicing licensee to understand. In fact, every two years when you renew your license you are certifying that you are familiar with the latest edition of Chapter 327, RSMo, as well as the latest edition of the Board Rules. The latest edition of Chapter 327, RSMo, and the Board Rules can be viewed at, or downloaded, from the [Board's website](#). The Board will even reward you with CEU credits for reading them and passing an online exam which can be taken from the [Board's website](#).

It is important to know that the law and rules change periodically to stay current with a profession whose practice is constantly evolving. And for those who have licenses in multiple states, it is a mistake to think that the laws and rules in one state are the same in other states. It is too easy for a licensee to become complacent in thinking that he or she knows the laws and rules that apply to their profession. A licensee should make it a routine to periodically read the statutes,

rules and regulations of Missouri that pertain to his or her practice, as well as, those of any other state that they are working in.

It is also important for a licensee to understand, when reading the Missouri law and rules that govern the practice of a design professional, it is possible for a client or an authority having jurisdiction (AHJ) to demand more than Missouri law and rules require, as long as their requirements are not in conflict. For example, Missouri's law and rules are very specific in the ways the seal of a licensee may be applied to a document, but some jurisdictions will only accept the "wet seal" or "wet signature" of a licensee. In another example, there may be circumstances when it may be acceptable under Missouri law and rules for either of two professions to perform similar design work, but a client or AHJ may decide that they will accept the design services provided by only one of the professions. Neither example conflicts with Missouri law and rules; however, the situation would change and become a violation if the licensee sealed a document that he or she was not qualified to seal.

Every year since becoming the Chair of the Architectural Division, I have used this particular edition of the Board's newsletter to keep Missouri licensed architects informed of NCARB changes to the Bylaws that govern the procedures or qualifications for obtaining an architectural license. Since Missouri relies upon NCARB certification as part of its licensure approval process, I feel it is important to keep architects who are not NCARB members informed of such changes. This year, there were no changes to the Bylaws at NCARB's annual meeting.

PROFESSIONAL ENGINEERING DIVISION LETTER

By: Kevin C. Skibiski, PE, SE, PLS, Division Chair

How did your Board become what it is today?

Did you know that we have been in existence for 76 years?

The Missouri Board for Architects, Professional Engineers, Professional Land Surveyors and Professional Landscape Architects (APEPLSPLA) is part of the Division of Professional Registration, within the Department of Insurance, Financial

Institutions, and Professional Registration.

Licensure of Architects and Professional Engineers was approved on August 2, 1941 and became effective on October 10, 1941 at which time the Missouri Board for Architects, Professional Engineers and Land Surveyors was created. The Board originally consisted of one Board Chair who had to be either an Architect or an Engineer, three Architects and three Engineers, one of whom had to also be a Land Surveyor.

In 1986, three Land Surveying Division Members were added to the Board along with one Public Member making the total number of members 11.

In 1989, the Landscape Architectural Council was formed and they started licensing landscape architects as a title act.

In 2001, the law regulating the practice of architecture, engineering, land surveying and landscape architecture (Chapter 327, RSMo), was amended to merge the Landscape Architectural Council with the Board and also to allow a Professional Land Surveyor to serve as Board Chair.

July 1, 2002 is the date of the official merger of the Landscape Architectural Council with the Board; thereby creating the Missouri Board for Architects, Professional Engineers, Professional Land Surveyors and Landscape Architects. This merger added three Landscape Architectural Members to the Board; however, the three

members were limited to one collective vote.

On August 28, 2009, the law was again amended to allow a Landscape Architect to serve as the Board Chair, it gave each member of the Landscape Architectural Division a vote, and it increased the number of engineers serving on the Board from three to four thus increasing the total number of Board Members from 14 to 15.

On August 28, 2014, the law was further amended to change the title of Landscape Architects to Professional Landscape Architects and the Board's name to the Missouri Board for Architects, Professional Engineers, Professional Land Surveyors and Professional Landscape Architects (APEPLSPLA).

Who makes up the Board?

APEPLSPLA currently consists of 15 members, a chairperson who can be either a licensed Architect, Professional Engineer, Professional Land Surveyor or Professional Landscape Architect; three Architects who constitute the Architectural Division; four Professional Engineers who constitute the Professional Engineering Division; three Professional Land Surveyors who constitute the Professional Land Surveying Division; and, three Professional Landscape Architects who constitute the Professional Landscape Architectural Division. Also included is a voting Public Member.

What exactly does the Board do?

APEPLSPLA's vision is focused. "Leading the way to a safe and prosperous quality of life for the people of Missouri by protecting all people and their property from dishonest, incompetent or unlawful design practices and services."

Likewise, APEPLSPLA's mission is simple. "To protect the health, safety and welfare of the citizens of Missouri through the regulation of the practice of architecture, engineering, land surveying, and landscape architecture."

PROFESSIONAL ENGINEERING DIVISION LETTER CONTINUED...

APEPLSPLA's values are listed below:

- Dedicated to protecting the people and property in Missouri
- Committed to transparency, integrity, and responsiveness
- Concerned about professional standards and competence in design
- Pursuing the accountability in licensing, adherence to professional standards, and fairness in disciplinary proceedings
- Striving to communicate effectively with all stakeholders

APEPLSPLA is established, defined and guided by Chapter 327, RSMo, and the Missouri Code of Regulations, Division 2030. APEPLSPLA took the initiative to review and suggest applicable edits to Chapter 327, RSMo, which was updated and revised in 2014 to include new definitions such as “design coordination,” “design survey,” “incidental practice,” and “responsible charge.” These terms, although frequently used, had never been defined by statute. The necessary edits to the regulations in Division 2030 began immediately and is in the process of being reviewed and approved.

APEPLSPLA represents the state of Missouri by licensing individuals and corporations who do architecture, engineering, land surveying, and landscape architecture in the state. As of December 31, 2016, this total number is 28,153 licensees (24,819 individuals and 3,334 corporations) and 30,785 interns.

APEPLSPLA meets face-to-face four times a year at different locations in Missouri. In addition, they communicate daily by email, phone, conference call, or letters. It is not unusual for a Board Member to spend several hours per week keeping up with information needed to conduct APEPLSPLA business.

The Board Members of APEPLSPLA are also active participants representing Missouri in the national organization for their respective disciplines. The Architects are members of the National Council for Architectural Registration Boards (NCARB). NCARB is comprised of the architectural boards of all 50 states and those of the District of Columbia, Puerto Rico, Guam, the Virgin Islands, and the Northern Mariana Islands. The Professional Engineers and Professional Land Surveyors are members of the National Council of Examiners for

Engineering and Surveying (NCEES). NCEES is comprised of 69 member licensing boards from each U.S. state, the District of Columbia, Guam, Puerto Rico, the U.S. Virgin Islands, and the Northern Mariana Islands. The Professional Landscape Architects are members of the Council of Landscape Architectural Registration Boards (CLARB). CLARB is comprised of the landscape architectural boards of all 50 states and those of the District of Columbia, Puerto Rico, Guam, the Virgin Islands and the Northern Mariana Islands. These associations of regulatory boards provide testing, data, information, and other services that their member boards may utilize, where permitted by state law, as they perform their licensing and regulatory duties.

Just how does the Board operate?

APEPLSPLA developed a Strategic Plan in 2016 to better position the Board to focus on the present and future direction needed in order to better serve the citizens of Missouri, streamline the processes dealing with licensees and educating the public, and in particular, the education institutions about licensure, professionalism, and ethics.

APEPLSPLA is fiscally responsible and has reduced its fees six times in the last eight years. Our renewal fees are currently the lowest renewal fees in the nation, with the individual renewal fee at \$35.00 and a corporate renewal fee at \$50.00, for a two-year renewal.

The fund balance needs to be healthy in order for the Board to perform the necessary work to protect the citizens of Missouri from dishonest, incompetent and/or unlawful design practices and services. One only has to remember the Hyatt Regency disaster in Kansas City, and the years of work by APEPLSPLA to see that those responsible were held accountable. APEPLSPLA was established as a self-funded Board by the legislature to protect the health, safety and welfare of all citizens of Missouri. It is important to remember the entire Board is completely funded from licensee fees and not state general revenue or collected civil penalties. APEPLSPLA has been very diligent in its financial management and will continue to do so in the future.

If you have any questions about APEPLSPLA, feel free to contact us through the Board office.

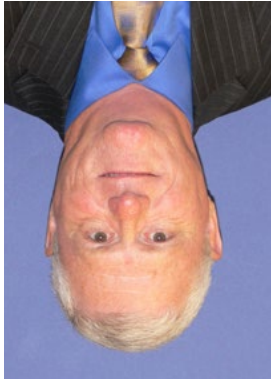

DIMENSIONS

By: Michael C. Freeman, PLS, Division Chair

PROFESSIONAL LAND SURVEYING DIVISION LETTER

Effective June 30th, our “new” surveying standards went into effect. Our congratulations goes to the Missouri Society of Professional Surveyors (MSPS), the Standards Committee, and other individuals who put in many hours updating our “Surveying Standards.” For those of you who have a “boilerplate” certification on your plats...please revise your certificate to cite the current standard: 20 CSR 2030-16.010.

Over the past two years, we’ve made some changes to the Missouri Specific Surveying exam. The most notable change was to include an exercise requiring the preparation of a written property description. The primary factor in developing this exercise was the poor quality of descriptions we were seeing while investigating surveying complaints. Back in “the day” when I made surveying my career, virtually everyone used a yellow book titled “Writing Legal Descriptions” and there was consistency in reading and writing property descriptions which included boundary calls to physical monuments. A number of surveyors today use computer programs to prepare their property descriptions and make no note of the discrepancy between the record and measured distances to physical monuments. If one of your employees is planning to take the Missouri Specific Surveying exam, I highly recommend that they obtain a copy of Gordon Wattles book...it will be quite helpful in passing the written description portion of the licensing exam.

Applicants for the Missouri Specific Surveying exam have remained reasonably constant but a significant number of those taking these exams are non-resident (comity) applications. And, what concerns us

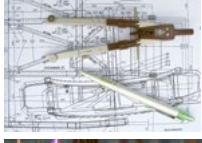

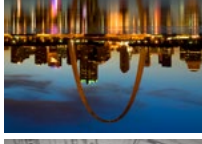

the most is that they are getting higher scores than the applicants who live and work in this state.

With the NCEES changeover to Computer Based Testing (CBT) last year, the numbers of applicants taking the national Fundamentals of Surveying (FS) exam appear to be recovering but it is still too early to make that call. Per NCEES for the 2014-2015 year (last one using paper/pencil and taken in April/October) there were 847 taking the test with 64% passing. With CBT for 2015-2016 and testing every month, the numbers dropped to 767 with a 63% pass rate. For 2016-2017 (thru 3 of the 4 quarters) the numbers of applicants who have taken the exam was 753 with a pass rate of 59%. However, there were an additional 62 that took the exam in the July/Aug/Sept time frame which pushed the overall number of examinees to 814...a significant increase over the previous year. While the numbers taking the exam appear to be improving, it is too early to draw any substantive conclusions about the pass rate. It may be a factor of the change in the testing process rather than a decline in surveying knowledge. They will need several testing cycles before they have sufficient data to draw any conclusions based on the statistics.

Last item: Surveying Complaints. We have seen a significant decrease over the past year in the number of complaints being filed. Most of the ones that are filed can be attributed to inadequate research or poor field search (failure to find existing controlling monuments); and, some cite specific violations of the Surveying Standards, the most common being failure to show controlling monumentation. A little extra attention to detail should eliminate the majority of complaints.

DIMENSIONS

PROFESSIONAL LANDSCAPE ARCHITECTURAL DIVISION LETTER

By: Robert S. "Bob" Shotts, PLA, PLS, Division Chair

Judy Kempker and I recently attended the CLARB annual meeting which was held in Boise, Idaho. In addition to the other issues that are normally discussed at these meetings, we considered a proposed model law for the licensing and regulation of Landscape Architecture. CLARB prepares and grades the licensing exams for 54 jurisdictions including three Canadian Provinces, Washington, DC, and Puerto Rico. As you can imagine, there is considerable variation between jurisdictions on licensure requirements. The purpose of the model law is not to dictate the requirements for licensure but to provide a framework for the future. Currently all 50 states and the District of Columbia have landscape architectural licensure. The model law was approved by the member boards.

STAY IN THE KNOW – SUBSCRIBE TO GOVDELIVERY

Receiving e-mail notifications regarding meetings, legislation, laws, rules, discipline, relevant publications and events, or e-news from the Board could not be easier. Simply join our email subscription service, GovDelivery. Once signed up, you will be notified when the Board or its Divisions hold meetings and you will receive important information related to your profession and licensure. Receive as many or as few notifications as you would like. You choose the lists to join.

Joining the subscribers list can be done in just a few easy steps.

- Visit the Board's website at <http://pr.mo.gov/apelsla>.
- Select the "Get APELSIA News" link located in the lower right-hand corner, directly below the Sub Navigation menu.
- This will take you to the GovDelivery signup page for DIFP.
- Enter the e-mail address at which you would like to receive notifications and then submit.
- Choose the list(s) you would like to join.
- A confirmation e-mail for each list you select will be sent to the e-mail address provided.

PUBLIC MEMBER LETTER

By: Sherry L. Cooper, Public Member

Formal regulation of professional landscape architects in Missouri is relatively young, beginning when the legislature created a Title Act in 1989; followed by enactment of legislation establishing the current Practice Act in 2001.

Despite the fact that the work product of landscape architects surrounds us in our lives, and in just about every setting imaginable in our communities, I wasn't consciously aware of much of it. However, I had reviewed the state

law describing the scope of practice of landscape architects after I was appointed to the Board, so I was well aware that my hiring a landscaping contractor from time to time to install a bit of hardscape and some new plants in my garden was not landscape architecture. Although my garden did look wonderful!

On Friday, September 8 – right as the new school year was getting underway – I had the pleasure of meeting with Rod Barnett, PhD, Chair of the accredited Master of Landscape Architecture program in the Sam Fox School of Design & Visual Arts at Washington University in St. Louis to learn more about the profession. Professor Barnett also gave me a tour of the facilities; both on the main campus as well as at the Lewis Center located off-site where studio space is provided for students in the program. It was interesting to see what new students, already immersed in the curriculum, were doing that first week of classes.

My visit to see the program at Washington University was not at the direction of the Board, but was a personal quest on my part to learn more about landscape architecture and how licensees protect the **health, safety and welfare of the public** – the threshold professions must meet before state legislatures establish licensure, the most

stringent form of professional regulation imposed by a state.

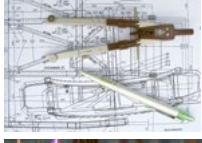

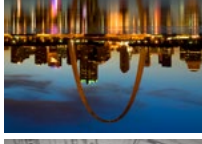

As our meeting began that afternoon I asked Professor Barnett about those services that, if not performed by landscape architects properly and up to generally accepted profession-wide standards, can adversely affect the **health, safety and welfare** of the public. After listening to him for an hour or so I realized that the breadth of services performed by landscape architects and the contribution of those services to the quality of our lives was far greater and more extensive than I imagined. He was quite eloquent in his passion for the work done by landscape architects and how communities can be transformed and improved. It didn't take long for me to understand how the **safety and welfare** of the public was protected, but I was struggling a bit with how the **health** of the public was a factor.

And then at some point during our meeting I had one of those “aha moments” where it occurred to me that my 25 year career in state government relations had inadvertently caused me to view protection of **health** through a micro lens. Based on my work revolving around legislation related to the licensing and regulation of healthcare professionals I had come to look at protecting the **health** of the public as making sure individual licensed healthcare providers did not harm individual patients. But, in the case of landscape architecture (and of course healthcare for that matter) Professor Barnett made me see that protection of the **health** of the public can also be defined through a macro lens. In other words, the health of entire communities and populations can be and are improved with properly applied principles of the profession. The role played by professional landscape architects in protection and even improvement of the **health** as well as the **safety and welfare** of communities is a valid reason for the state to ensure that landscape architects are educated, trained, and tested in both the art and science of landscape architecture before becoming licensed to practice independently.

I was grateful for the time Professor Barnett spent with me and for the information and passion he shared about a profession that clearly delivers much more to assure the health, safety and welfare of entire communities and populations than I realized before I arrived that day.

DIMENSIONS

PUBLIC MEMBER LETTER CONTINUED...

On another topic, I was able to attend the National Council of Examiners for Engineering and Surveying (NCEES) Annual Meeting for a second time on August 23-26. In addition to the business sessions, I attended several education sessions. One of these was an update for board members on the psychometrics of the examinations administered by NCEES. Modern licensure began in the U.S. in the late 1800s which eventually evolved to include passage of entry-level licensure exams. Originally most licensing boards for most of the professions wrote and administered their own exams – not something board members were generally skilled at doing. Today state boards almost universally delegate their entry-level testing responsibilities to the national associations of boards for each profession. But, individual licensing boards have a duty to ensure that the development, content, and

scoring of those exams administered by the national associations of boards continues to meet the state's requirements to properly evaluate candidates for licensure. Attending these sessions is an important way to monitor all of the above. I also attended a session providing information on the Accreditation Board for Engineering and Technology (ABET) accreditation process, NCEES international mutual agreements, and the NCEES credentials evaluation program. I find the NCEES Annual Meetings to be organized and informative. Active participation by member board administrators and member board members is an important way to ensure NCEES and its programs continue to be relevant to APEPLSPLA as a Missouri public protection agency.

Two new courses have been added to the Missouri Society of Professional Surveyors' (MSPS) Online Learning Portal by Board Member, Mike Flowers; each worth 1 Professional Development Unit (PDU).

This is a two-part series on the Missouri Surveying Standards for Property Boundary Surveys. The Board has approved both courses as being applicable to the mandatory Surveying Standards requirements as called for in Board Rule 20 CSR 2030-8.020.1(A).

If you're looking for credible, complete online education to get yourself "topped" up with PDUs for license renewal, MSPS' portal is a great place to get them. You can take the courses anytime and anywhere that you can access the Internet. If you need the Missouri Surveying Standards, here are two PDUs you can immediately access offered by an authoritative source from right in Missouri.

Click here to access the portal: <http://www.missourisurveyor.org/msps-portal.php>

MOVING?

PLEASE NOTIFY THE BOARD OFFICE OF YOUR NEW ADDRESS

The rules and regulations require all licensees to notify the Board of all such changes by sending a letter, e-mail, or change of address form to the office in Jefferson City, Missouri. Please include a street address to facilitate any express mail deliveries.

You can either send the change via the following link:
<https://renew.pr.mo.gov/apelsla-coa.asp>; by email
moapeplspla@pr.mo.gov; or by U.S. Mail to:

Missouri Board for Architects, Professional Engineers,
Professional Land Surveyors and Professional
Landscape Architects
3605 Missouri Boulevard,
Jefferson City, MO 65109

NEW MISSOURI SURVEYING STANDARDS

Please be advised that the new Missouri Surveying Standards went into effect June 30, 2017. All Missouri licensed professional land surveyors are required to practice in compliance with the new standards; therefore, you are encouraged to study and become very familiar with them. In addition, all complaints involving possible violations of surveying standards will be evaluated by the Board using these new standards. To view the new standards, please click on the below links:

www.sos.mo.gov/cmsimages/adrules/csr/current/20csr/20c2030-16.pdf

www.sos.mo.gov/cmsimages/adrules/csr/current/20csr/20c2030-18.pdf

www.sos.mo.gov/cmsimages/adrules/csr/current/20csr/20c2030-19.pdf

www.sos.mo.gov/cmsimages/adrules/csr/current/20csr/20c2030-20.pdf

If you have any questions, please contact the Board office at moapeplspla@pr.mo.gov or call (573) 751-0047.

ARCHITECTS - HOW YOU CAN HELP SPREAD THE WORD?

We would like your help reminding candidates about the upcoming retirement of ARE® 4.0. We want to make sure everyone with active eligibilities in ARE® 4.0 is ready and in the best position possible for the change come July 1, 2018.

If you know anyone currently taking the ARE® 4.0, please have them contact NCARB (communications@ncarb.org) if they would like additional resources or if they have any questions.

TITLE BLOCKS: IDENTIFY YOUR WORK

By: Edwin Frownfelter, Litigation Counsel

The Code of Professional Conduct, at [20 CSR 2030-2.050\(1\)](#), requires that “An architectural, engineering, land surveying, or landscape architectural entity shall incorporate a title block on all drawings, exhibits, plans, plats, maps, and surveys that are required to be signed and sealed by Chapter 327, RSMo, and these regulations.”

An entity may be a company or an individual licensee, but in any event all projects which require a seal must also contain a title block.

The Board has clarified that the requirement of a title block is not satisfied merely by including the required information somewhere on the page. The title block should be enclosed in an outline of some shape, usually a rectangle along one edge of the page or in one corner containing specific information within that outline.

The elements required in a title block are specified in 20 CSR 2030-2.050(2). The title block must show:

- The name of the licensee either as sole proprietor, partnership, corporation, limited liability company, or other entity;
- The licensee’s address and phone number;
- The name or identification of project;
- The address/location of project, including city or county and state;
- The date prepared;
- The printed name, discipline, and license number of the person sealing the document; and

- The printed name, discipline, and certificate of authority number of the organizational entity, if any.

It must also contain a space where the licensee’s seal, signature, and date are to be placed.

It is essential that the title block contain the contact information for the person who seals the document and/or the entity with which that person is associated, not some other party. The Board has found title block violations where a licensee seals a document prepared by and showing in the title block some other entity, such as a professional engineer sealing a fire alarm plan showing an unlicensed fire protection company as the contact point in the title block.

Licensees have also run into title block issues by sealing plans showing contact information for companies with which they are associated, but which do not hold a Missouri certificate of authority. If a licensed person is hired or employed by a company not holding a certificate of authority, the licensee should make sure his or her contact information is in the title block as a sole practitioner, as the rule clearly requires that the party identified in the title block be the “licensee.”

The Board’s website offers some frequently asked questions and an example of a properly designed title block [here](#).

Disclaimer:

The articles in this newsletter are the work and opinion of the individual authors and do not necessarily reflect the official opinion or position of the Board.

IMPORTANT INFORMATION REGARDING THE RENEWAL OF YOUR LICENSE

If you were originally licensed in an ODD year, you are due to renew your license by December 31st of this year. In fact, you should have already received a “Renewal Notice” around the first part of October reminding you to renew.

Based on renewal statistics collected over the past several years, it has been documented that approximately 90% of our licensees had renewed their license online. Therefore, in an ongoing effort to keep your renewal fee one of the lowest in the nation, we opted again this year to send “Renewal Notices” reminding you to renew your license in lieu of the actual paper “Renewal Application.” The “Renewal Notice” provides a PIN number along with instructions on how to renew your license via the Board’s online renewal feature. By renewing online, you are provided with immediate confirmation that your license renewal has been received. It also allows you to pay your renewal fee with a major credit card. Both individuals and corporations can renew online.

Although we strongly encourage you to renew your license online, we realize not everyone has that capability nor is the online renewal feature available for everyone. Online renewals are not available for the following licensees*:

- Licensees wishing to change their license status from active to inactive.
- Licensees who currently hold an inactive license and wish to return to an active status.
- Licensees who currently hold an inactive license and wish to remain inactive.
- Licensees who will have reached the age of 75 or older.
- Licensees renewing after 11:59 p.m. central standard time on December 31, 2017.

*These licensees must complete and submit a paper renewal application. To request a paper renewal application, please call the Board office at (573) 751-0047.

In closing, we kindly remind you of the following:

- Renewal notices are mailed as a courtesy to all licensees.
- The renewal notice is mailed to your address of record on file at the Board office. If you move, it is your responsibility to notify the Board office of your new address promptly so that we can update your record.
- The Board cannot be responsible for misplaced or mishandled mail.
- Failure to receive a notice for renewal of a license or certificate of authority does not relieve the licensee or certificate holder from their duty to timely renew, nor does it relieve them from the obligation to pay any additional fee(s) necessitated by any late renewal.

It is the licensee’s responsibility to ensure that the renewal application is completed and submitted in a timely manner. The renewal period will end on December 31, 2017. A licensee who fails to renew his/her license by the renewal date shall not practice in Missouri. Licensees practicing in Missouri without a renewed license are subject to disciplinary action by the Board.

If you are not sure when your license expires, you can either call the Board office, visit the Board’s website and click on “Licensee Search” via <https://renew.pr.mo.gov/licensee-search.asp>, or look at the 5 x 7 certificate sent the last time you renewed-----it will display your expiration date.

NOTE: Section 324.010 – No Delinquent Taxes, Condition for Renewal of Certain Professional Licenses

All persons and business entities renewing a license with the Division of Professional Registration are required to have paid all state income taxes and also are required to have filed all necessary state income tax returns for the preceding three years. If you have failed to pay your taxes or have failed to file your tax returns, your license will be subject to immediate suspension within 90 days of being notified by the Missouri Department of Revenue of any delinquency or failure to file. If your license is suspended for state income tax, you must stop practicing immediately and you cannot return to practice until your license is active again. If you have any questions, you may contact the Department of Revenue at 573-751-7200.

EXAMINATION DATES AND FILING DEADLINES

The **Fundamentals of Engineering** and the **Fundamentals of Surveying Examination** are offered at Pearson VUE testing centers in a Computer Based Testing (CBT) format. The examinations are offered year round. There are four testing windows which are the four quarters of the year. A candidate may not sit for the examination more than once per window and no more than three times in a twelve month period. Candidates for the FE or FS examination must register directly with NCEES at www.ncees.org. After successfully completing the FE or FS examination, examinees will need to complete an application for enrollment as an engineer intern or land surveyor-in training. Application forms can be obtained from the Board's website; <http://pr.mo.gov/apelsla.asp>.

With the exception of the chemical discipline, an application to take the Principles and Practice of Engineering Examination must be filed with and approved by the Board **prior** to registering with NCEES to take the examination. Application forms are available on the Board's website; <http://pr.mo.gov/apelsla.asp>. After your application is approved by the Board, you will be provided with instructions to schedule with NCEES.

Principles and Practice of Engineering Examination Dates	Application Filing Deadline	Re-Examination/ Re-Scheduling Application Filing Deadline
April 13, 2018	December 1, 2017	February 15, 2018
October 26, 2018	June 1, 2018	August 15, 2018
April 5, 2019	December 1, 2018	February 15, 2019
October 25, 2019	June 1, 2019	August 15, 2019
April 17, 2020	December 1, 2019	February 15, 2020

An application to take the **Principles of Surveying Examination** must be received and approved by the Board **prior** to registering with NCEES to take the examination. Application forms are available on the Board's website; <http://pr.mo.gov/apelsla.asp>. The examination is offered year round and will be administered only at approved Pearson VUE testing centers. There are four testing windows which are the four quarters of the year. Candidates may take the examination only one time per testing window and no more than three times in a twelve month period.

After your application is approved by the Board, you will be provided with a form to schedule the **Missouri Specific Examination**.

Missouri Specific Examination Dates	Application Filing Deadline	Re-Examination/ Re-Scheduling Application Filing Deadline
January 17, 2018	November 1, 2017	January 1, 2018
April 18, 2018	February 1, 2018	April 1, 2018
July 18, 2018	May 1, 2018	July 1, 2018
October 17, 2018	August 1, 2018	October 1, 2018
January 16, 2019	November 1, 2018	January 1, 2019
April 17, 2019	February 1, 2019	April 1, 2019

A completed application for examination or re-examination/ re-scheduling must be received in the Board office no later than the filing deadline; NO EXCEPTION.

Please access www.ncees.org for additional examination dates and other useful information.

2017 L.A.R.E. Administration Dates & Deadlines

Registration will be open September 5 - November 27.
Cancellation deadline: November 27

December Exam Fees:

Sections 1 (Project and Construction Management)
and Section 2 (Inventory and Analysis): \$360 per
section

Sections 3 (Design) and Section 4 (Grading, Drainage
and Construction Documentation): \$560 per section

CHEMICAL ENGINEERING DISCIPLINE

NCEES PRINCIPLES AND PRACTICE OF ENGINEERING EXAMINATION

The chemical discipline of the NCEES Principles and Practice of Engineering Examination is a computer based examination which is offered year-round at approved Pearson VUE test centers. Visit <http://ncees.org/engineering/pe/chemical> for details.

It's important to register and schedule the chemical discipline of the PE exam as far in advance as possible to secure an appointment at your preferred approved Pearson VUE test center. Test centers can fill up quickly.

HOW TO REGISTER & SCHEDULE:

- Login or create your MyNCEES account and complete the registration process, <https://ncees.org/supplemental/launch-login/>

Upon passing the chemical discipline of the NCEES Principles and Practice of Engineering Computer Based Test (CBT), you will need to make application with the Board for licensure as a Professional Engineer. Please be aware that you must meet Missouri requirements. Taking and passing the examination **does not** guarantee that your application for licensure as a Professional Engineer will be approved.

If you **FAIL** the examination, you will need to re-schedule with NCEES.

NO GOOD DEED UNPUNISHED: A SAGA IN ETHICS

By: Edwin Frownfelter, Litigation Counsel

Angie Near is a professional engineer licensed in Missouri and Kansas. She is one of the principals of the firm of Near and Farr, Inc., located in Leawood, Kansas. Near and Farr holds a certificate of authority as an engineering corporation in Kansas and is registered to do business as a foreign corporation with the Secretary of State of Missouri.

Angie is a contributor to Pawsabilities, an animal shelter located in Little City, Missouri. She is approached by Dee Zeiner, a friend who is an active volunteer with the shelter and who owns DeeLight Designs, a residential design business in Little City. Dee explains that the shelter is building a new, larger facility designed to house 60 animals and 5-6 staff and several volunteers, along with a veterinary office with 3 employees. Dee states that she has drawn up a design including floor plan, elevations, and electrical, mechanical, and plumbing plans, covering about 10,000 square feet. However, the permits officer at the Little City planning office has informed her that plans sealed by a licensed professional are required before a building permit can be issued. Dee asks whether Angie will seal the plans on a pro bono basis as a contribution to the shelter.

Angie reviews the plans and makes changes to bring various systems into compliance with the International Building Code, 2015 Edition. Angie seals and signs the plans and sends them back to Dee Zeiner, who gives them to the general contractor to submit to the Little City planning office. The permit office returns the plans, pointing out that they still show Dee's company DeeLight Designs in the title block. Dee prepares a new set of plans showing Near and Farr in the title block. Angie seals them and returns them to Dee. A building permit is issued and construction then begins.

Angie receives a call from Archie Teck, an architect in Kansas City. He advises her that three years ago, he employed Dee

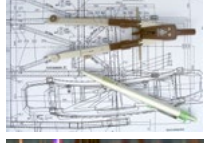

Zeiner as a drafter, and she worked on a design for another shelter in North Kansas City. He states that Pawsabilities approached him about designing a shelter, and he showed them the design, but the organization was unwilling to pay his fee, so he never undertook the project. He says the Pawsabilities design is identical to the prior shelter, and accuses Zeiner of stealing his design and Angie of enabling her by sealing the plans. He informs Angie he is filing a complaint with the Board.

What issues will Angie face in a disciplinary inquiry?

See [Page 17](#) for answers.

Based on true cases

Answers:

Here are some of the issues where Angie may have committed violations of Board statutes and rules. Under the terms of Section 327.441.2(6), RSMo, violation of any of the statutes of Chapter 327 or regulations at 20 CSR Division 2030 provide the Board with cause to impose discipline on a licensee.

The fact that Angie performed services as a volunteer and was not paid does not abate or excuse any violations of professional standards.

1) Immediate Personal Supervision.

Section 327.411, RSMo, requires that a licensee can only seal plans prepared by the licensee, or under his or her immediate personal supervision. Immediate personal supervision is defined at 20 CSR 2030-13.010 in the Board's rules and regulations. Immediate personal supervision requires: a) that the client request the work from the licensee or his/her employees; b) that the licensee supervise each step in the preparation of the documents; and c) that the licensee review the final product and make changes if necessary.

In this fact situation, the plans were not prepared under Angie's immediate personal supervision, as she did not communicate with the ultimate client, and the plans were already drafted when she first became involved, so she did not supervise each step of their preparation. Since Dee Zeiner is not her employee, work done before Angie became involved was not performed under her immediate personal supervision. Angie probably violated Section 327.411, RSMo, by sealing documents not prepared under her immediate personal supervision.

2) Unlicensed Practice of Architecture.

The project was one which required the involvement of an architect to design. Section 327.101, RSMo, prohibits anyone not an architect (including a professional engineer) from designing buildings that do not fit under any of the exceptions in Section 327.101(5), RSMo, which are:

a. A dwelling house;

3) Assisting the Unlicensed Practice of Architecture.

Since the shelter is larger than 2,000 square feet and is intended for use by more than nine persons, it does not fit under the exceptions, and design by an architect was required. By sealing the plans, Angie engaged in the unlicensed practice of architecture in violation of Section 327.101, RSMo.

- b. A multifamily dwelling unit for two families;
- c. A commercial or industrial building designed for use by fewer than nine people;
- d. A building containing less than 2,000 square feet; or
- e. A building used exclusively for farm purposes.

4) Title Block Violations.

The Board's rule at 20 CSR 2030-2.050(1) states that all documents requiring a seal must contain a title block. 20 CSR 2030-2.050(2) prescribes very specifically what information must be included in a title block. Literal compliance with each of these requirements is expected in all title blocks.

20 CSR 2030-2.050(1)(a) requires that the title block specify "The name of the licensee either as a sole proprietor, partnership, corporation, limited liability company, or other appropriate entity." The title block should be in the name of the licensee who seals the document, or of a licensed entity in which the licensee is an employee, principal, or member. A licensee should never seal a document listing in the title block an entity with which he or she is not associated in one of these capacities.

In this case, Angie first violated the title block by sealing a set of plans listing Deelight Designs, an unlicensed entity with which she had no connection, as the responsible party. When the plans

Answers continued...

were returned, she sealed documents showing Near and Farr as the licensee. Because Near and Farr does not hold a certificate of authority as an engineering corporation in Missouri, it could not qualify as the “licensee” for title block purposes either.

Assuming it was permissible for Angie to seal the plans, she could have placed her own information in the title block as a sole practitioner, rather than using the name of her unlicensed company.

5) Practicing under an Unlicensed Organizational Name

Near and Farr is registered to do business in Missouri with the Secretary of State of Missouri, but it does not hold a certificate of authority as an engineering company in Missouri issued by the Board under Section 327.401.2, RSMo. Therefore, it is ineligible to practice engineering in Missouri, and listing it as the responsible entity in the title block is a violation of both the title block rule and the prohibitions on unauthorized practice of architecture and professional engineering.

6) Dishonesty – use of stolen design

A licensee who knowingly violated the intellectual property of another licensee by copying a design without attribution may commit fraud or dishonesty in the performance of a licensed profession, which violates Section 327.441.2(5), RSMo. In this case Angie did not know Dee Zeiner had copied her former employer’s design, but her failure to supervise each step of the design process exposes her to ethical issues.

Board Rule 20 CSR 2030-13.010(1)(D) provides for circumstances under which a successor licensee can seal plans where a prior licensee is unavailable to complete the work, or the work is a site adaptation of a standard design drawing or a design sealed by an out-of-jurisdiction licensee. However, this requires the licensee to take responsible charge by performing all professional services including developing a complete design file with work or design criteria, calculations, code research, and any necessary and appropriate changes to the work. The licensee must also take complete personal responsibility for the work product.

AWARDS

Source and photo credit courtesy of The Missouri Engineer, official publication of the Missouri Society of Professional Engineers.

The Board is pleased to announce that former Board Member, Josephine (Jo) L. Emerick, P.E., of St. Louis, and current Board Member, Kevin C. Skibiski, P.E., P.L.S. of Ozark, have been selected to be inducted into the Missouri Society of Professional Engineer's (MSPE) Hall of Fame.

The induction ceremony took place at the Society's 80th Annual Convention on Monday, June 19, 2017 at The Lodge at Old Kinderhook in Camdenton, Missouri.

MSPE's Hall of Fame is the highest award presented to recognize individual engineers or friends of the profession whose personal accomplishments, awards and activities exemplify the goals and objectives of the society and positively promote the professional engineering community. In addition to a framed resolution, the winner's name is engraved on a perpetual plaque on display in MSPE's headquarters building. The engraved plaque appearing above individual name plates reads "Setting High Standards For Others to Emulate ... Their Legacy Will Be A Permanent Part Of Who And What We Are." The addition of Jo Emerick, P.E. and Kevin Skibiski, P.E., P.L.S. mark the 17th and 18th inductees since the initial Class of 2000 induction of six members and a friend of the profession, former MSPE Executive Director Paul E. Jobe.

The Board enthusiastically congratulates Jo and Kevin on receiving this deserved and very exceptional MSPE honor.

The Board is pleased to announce that AIA Missouri has selected James (JC) Rearden, AIA of St. Louis, to be honored as the 2017 recipient of the Distinguished Service Award. JC's accomplishments for the profession include serving as Director and Chapter President of AIA St. Louis; Director and President of AIA Missouri; and, since 2010, he has represented Missouri Architects on the Board, currently as Architectural Division Chair. JC is passionate about protecting the practice of architecture as witnessed by the thousands of hours spent on behalf of each architect in our state serving in these various capacities. JC was recognized and honored at the AIA Annual Business Meeting and Awards Presentation which was held on Thursday, September 28th in Springfield, Missouri.

The Board congratulates JC on his many accomplishments and for being the recipient of this year's very prestigious AIA award.

DISCIPLINARY ACTIONS

DISCLAIMER: Every effort has been made to ensure that the following enforcement information is correct. However, this information should not be relied upon without verification from the Board office. It should be noted that the names of companies and individuals listed may be similar to the names of the parties who have not had enforcement actions taken against them. Discipline orders are public data and copies may be obtained by contacting the Board office. Pursuant to Chapter 327, RSMo, a licensee is entitled to engage in the practice of architecture, engineering, land surveying or landscape architecture during his/her probationary period providing that the licensee adheres to all of the terms and conditions of the Order. However, a licensee whose license has been suspended, is not entitled to engage in the practice of architecture, engineering, land surveying or landscape architecture during his/her suspension period.

LICENSEES CURRENTLY ON SUSPENSION

BORGARD, MICHAEL GLENN, PE-24533 (Fenton, Missouri) – suspended pursuant to Section 324.010, RSMo, on August 14, 2016.

CORN, MICHAEL LEWIS, A-3427 (St. Louis, Missouri) – suspended pursuant to Section 324.010, RSMo, on June 21, 2014.

ERD, ANDREW L., A-2016033870 (Glendale, Missouri) – suspended pursuant to Section 324.010, RSMo, on September 3, 2017.

GABERT, MARK A., PLS-2002000248 (Golden, Colorado) – suspended pursuant to Section 324.010, RSMo, on September 3, 2017.

GOMEZ, MARIO P., PE-19007 (Ladue, Missouri) – suspended pursuant to Section 324.010, RSMo, on November 21, 2009.

GOODMAN, CHARLES LOUIS, PE-2005024489 (Manhattan, Kansas) – suspended pursuant to Section 324.010, RSMo, on June 21, 2014.

GRAEFE, SAMUEL WARD, PE-18597 (Moore, Oklahoma) – suspended pursuant to Section 324.010, RSMo, on April 23, 2011.

GROTHE, THOMAS J., PE-19840 (Columbia, Missouri) – suspended pursuant to Section 324.010, RSMo, on September 3, 2017.

HENNEBERG, MARK ANDREW, PE-2008009296 (Olathe, Kansas) – suspended pursuant to Section 324.010, RSMo, on September 3, 2017.

KLEIN, EDWARD F., PE-13977 (Kansas City, Missouri) – suspended pursuant to Section 324.010, RSMo, on May 21, 2012.

LUCAS, MARTIN A., PLS-1857 (East Prairie, Missouri) – suspended pursuant to Section 324.010, RSMo, on November 21, 2009.

MAGEE, ALLAN HAROLD, PE-24813 (Ballwin, Missouri) – suspended pursuant to Section 324.010, RSMo, on August 14, 2016.

MARTIN, GREGORY LYNN, A-6885 (Lee's Summit, Missouri) – suspended pursuant to Section 324.010, RSMo, on September 3, 2017.

MCBRIDE, ROLAND E., PLS-2486 (Lee's Summit, Missouri) – suspended pursuant to Section 324.010, RSMo, on August 14, 2016.

SHOCKLEY, RICKEY W., PE-25613 (Independence, Missouri) – suspended pursuant to Section 324.010, RSMo, on September 3, 2017.

STANLEY, HAROLD RAY, PE-19372 (Peculiar, Missouri) – suspended pursuant to Section 324.010, RSMo, on June 19, 2010.

WOLF, DONALD R., PE-23385 (Lee's Summit, Missouri) – suspended pursuant to Section 324.010, RSMo, on June 21, 2014.

LICENSEES CURRENTLY ON PROBATION

ATHEY, BRADFORD NEAL, A-2015017495 (Lenexa, Kansas) – probation commenced on August 16, 2017 and ends on August 15, 2019.

CURTIS, DONALD DUSTIN, A-2011008143 (Phoenix, Arizona) – probation commenced on October 4, 2016 and ends on October 3, 2019.

DWYER, TODD L., PLS-2656 (La Jolla, California) – probation commenced on November 12, 2016 and ends on November 11, 2017.

GOEL, RAM A., PE-2012028374 (Tampa, Florida) – probation commenced on September 11, 2017 and ends on March 10, 2018.

SONEY FM, LLC, E-2012036929 (Tampa, Florida) – probation commenced on September 11, 2017 and ends on March 10, 2018.

THD DESIGN GROUP, INC., LS-2011004412 (Chesterfield, Missouri) – probation commenced on December 17, 2016 and ends on December 16, 2017.

PROBATIONS

HAWKINS, DARRYL WARREN, A-2001023626

Kansas City, Missouri

Summary: On December 8, 2014, the Board revoked the professional engineer's license of Stephen P. Maslan. Mr. Maslan was the owner and principal of Stephen P. Maslan and Company, an engineering firm located in Kansas City, Missouri. After his revocation, Mr. Maslan discussed with Mr. Hawkins whether Mr. Hawkins would serve as the managing agent for architectural projects by Stephen P. Maslan and Company. Under the arrangement reached between Messrs. Hawkins and Maslan, Mr. Maslan was the point of contact for clients referred to Mr. Hawkins through Stephen P. Maslan and Company. Under the arrangements reached between Messrs. Hawkins and Maslan, Mr. Maslan and employees of Stephen P. Maslan and Company performed structural engineering and drafting work in Stephen P. Maslan and Company's office as well as they reviewed the work at Mr. Maslan's office. On or about August 22, 2014, Mr. Hawkins filed with the Board an application for issuance of a certificate of authority as an architectural corporation on behalf of Stephen P. Maslan and Company. At the top of Page 2 of the application, the form quoted the language of 20 CSR 2030-10.010(2) that, "The managing agent shall be an owner or officer of a corporation, or member of a limited liability company, or a full-time employee of a corporation or a limited liability company." Beneath this language, the managing agent is required to affirm that "as managing agent, I will be responsible for... Assurance that the firm institutes and adheres to policies that are in accordance with Chapter 327, RSMo, and/or 20 CSR 2030." Mr. Hawkins signed as managing agent below this language. At the time, Mr. Hawkins signed the application it was the initial plan that he would be a full-time employee, and

do 100% of the projects. However, Mr. Hawkins never became an owner, officer, or full-time employee of Stephen P. Maslan and Company. Mr. Hawkins has never been paid a salary or a partnership distribution by Stephen P. Maslan and Company, but initially Mr. Hawkins thought that he was to be paid a salary and he invoiced his time. Mr. Hawkins signed a statement affirming that he would assure that Stephen P. Maslan and Company was in compliance with all statutes and regulations of the Board. However, as the intent for him to become a full-time employee did not come to pass, Mr. Hawkins did not meet the qualifications for a managing agent. During his association with Stephen P. Maslan and Company, Mr. Hawkins worked on approximately twelve projects referred to him by Stephen P. Maslan and Company. On projects that Mr. Hawkins performed in cooperation with Stephen P. Maslan and Company, most of the preparation and drafting work was done in the offices at Stephen P. Maslan and Company located at 8011 Paseo, Suite 201, Kansas City, Missouri. Mr. Hawkins' primary office was not in the Stephen P. Maslan and Company office, but in his office located at 2 West 52nd Street, Kansas City, Missouri. Some of the work was performed by Stephen P. Maslan and Company staff at the Paseo office, and it was reviewed by Mr. Hawkins at Stephen P. Maslan and Company offices under Mr. Hawkins' immediate personal supervision. Mr. Hawkins did not amend the application, or notify the Board when the initial plan of partnership or full time employment did not come to fruition. By failing to correct the statement that he was qualified to serve as Managing Agent of Stephen P. Maslan and Company when he never qualified by reason of being an owner, member, or full-time employee, Mr. Hawkins made a false statement in connection with obtaining issuance of a certificate of authority, which is cause for discipline under Section 327.441.2, RSMo.

Cause for Discipline: The Board had cause for disciplining Mr. Hawkins' architectural license under Section 327.441.2(3), RSMo, by use of fraud, deception, misrepresentation or bribery in securing any license or certificate of authority issued pursuant to this chapter or in obtaining permission to take any examination given or required pursuant to this chapter; Section 327.441.2(6), RSMo, by violation of, or assisting or enabling any person to violate, any provision of this chapter, or of any lawful rule or regulation adopted pursuant to this chapter; and, Section 327.441.2(10), RSMo, by assisting and enabling any person to practice or offer to practice any profession licensed or regulated by this chapter who is not licensed and currently eligible to practice pursuant to this chapter.

Board Action: Mr. Hawkins signed a Settlement Agreement with the Board agreeing to his architectural license being placed on probation for a period of two years commencing on August 2, 2017 and ending on August 1, 2019.

MAR, DAVID CLIFTON, PE-2016010967

Berkeley, California

Summary: On April 28, 2016, Mr. Mar signed a Consent Order with the West Virginia Board of Registration for Professional Engineers, both as to his personal license and as to the certificate of authorization of Mar Structural Design. In the Consent Order, Mr. Mar stipulated to the following facts: 1) Mr. Mar and the Company, Mar Structural Design, began work on structural design for a project located in West Virginia in September 2015; 2) Mr. Mar did not hold a West Virginia license and Mar Structural Design did not hold a certificate of authorization in September 2015; 3) Mr. Mar applied for and was granted comity licensure in West Virginia in December 2015; and, 4) Mr. Mar applied for

and was granted a certificate of authorization for Mar Structural Design in December 2015. Mr. Mar admitted that he violated West Virginia statutes by working on a West Virginia project before he had a professional engineering license and before Mar Structural Design had a certificate of authorization. Thereafter, Mr. Mar agreed to pay civil penalties of \$250 each for himself and for Mar Structural Design, LLC, in full settlement of the charges against him. On October 14, 2016, Mr. Mar renewed his Missouri license using the Board's online renewal system. One of the items in the online renewal process asks the licensee to indicate agreement with the statement, "In any other licensing jurisdiction, I have not been the subject of disciplinary action, or entered into any type of settlement agreement, providing for any limitation on my ability to practice, or monetary penalty or payment of costs that I have not previously disclosed to this Board." Mr. Mar selected a box indicating his agreement with the statement. Mr. Mar's agreement with this statement constituted a representation that he had not been the subject of any disciplinary action in another jurisdiction which had not been disclosed to the Missouri Board.

Cause for Discipline: The Board had cause for disciplining Mr. Mar's professional engineering license under Section 327.441.2(3), RSMo, by use of fraud, deception, misrepresentation or bribery in securing any license or certificate of authority issued pursuant to this chapter or in obtaining permission to take any examination given or required pursuant to this chapter; and, Section 327.441.2(8), RSMo, by disciplinary action against the holder of a license or a certificate of authority, or other right to practice any profession regulated by this chapter granted by another state, territory, federal agency or country upon grounds for which revocation or suspension is authorized in this state.

Board Action: On May 23, 2017, Mr. Mar signed a Settlement Agreement with the Missouri Board agreeing to his Professional Engineering license #PE-2016010967 being placed on probation for a period of one year commencing on June 21, 2017 and ending on June 20, 2018.

ATHEY, BRADFORD NEAL, A-2015017495

Lenexa, Kansas

Summary: On April 25, 2008, Bradford Neal Athey filed an application with the Missouri Board for licensure as an architect. As part of the application, Mr. Athey truthfully answered "no" when asked if he had ever been convicted of any crimes and when asked if there existed any criminal charges pending against him. Thereafter, the Board approved Mr. Athey's application subject to his passing the Architect Registration Examination® (A.R.E.®) by letter dated May 12, 2008. Mr. Athey took various sections of the A.R.E.® between 2010 and 2014, passing six and failing one. On May 13, 2013, Mr. Athey pleaded guilty to tampering with computer data in violation of Section 569.096.1, RSMo, a Class A misdemeanor. The court suspended imposition of sentence and placed Mr. Athey on probation for two years, with conditions. Mr. Athey successfully completed his probation and received his discharge on May 12, 2015. On May 18, 2015, Mr. Athey received notice that he passed the final section of the A.R.E.®. Based on notice of Mr. Athey's passage of the A.R.E.®, on June 5, 2015, the Missouri Board issued Mr. Athey's certificate of licensure. On December 28, 2015, Mr. Athey filed an application to renew his architectural license. Question 1 on the renewal application asked, in part, if Mr. Athey has "been finally adjudicated and found guilty or entered into a plea of guilty in a criminal prosecution...that you have not previously disclosed to this Board." Mr. Athey answered "yes" to Question 1. Question 1 represented the first time that the Board affirmatively asked a question which required Mr. Athey to disclose the suspended

imposition of sentence entered by the court on May 13, 2013, as referenced above. While Mr. Athey truthfully answered all questions asked of him as part of the application and renewal processes, the Board did not know of the criminal charges against Mr. Athey or his plea of guilty prior to its decision to grant licensure on June 5, 2015.

Cause for Discipline: The Board had cause for disciplining Mr. Athey's architectural license under Section 327.441.2(11), RSMo, because his license was issued under a material mistake of fact, to wit, the Board's lack of knowledge of his guilty plea to criminal charges.

Board Action: On July 25, 2017, Mr. Athey signed a Settlement Agreement with the Missouri Board agreeing to his architectural license #A-2015017495 being placed on probation for a period of two years commencing on August 16, 2017 and ending on August 15, 2019.

PROBATION AND CIVIL PENALTY

GOEL, RAM A., PE-2012028374

SONEY FM, LLC, E-2012036929

Tampa, Florida

Summary: Ram A. Goel is the President and Managing Agent for Soney FM, LLC. Mr. Goel holds a license as a professional engineer and Soney FM, LLC holds a certificate of authorization as an engineering firm in the state of Ohio, which was issued by the Ohio Board. On April 13, 2016, Mr. Goel, as managing agent for Soney FM, LLC, signed a settlement agreement for discipline of Soney FM, LLC's certificate of authorization with the Ohio Board. In the settlement agreement, Mr. Goel stipulated that Soney FM, LLC had provided professional engineering services on four projects located in Ohio without possessing an active certificate of authorization to offer or perform professional engineering services in Ohio. Mr. Goel admitted that this conduct violated Ohio law regarding registration of engineering firms. Mr. Goel agreed to pay a fine to the state of Ohio in the amount of \$500. The settlement agreement was accepted by the Ohio Board and became a final order of discipline on May 17, 2016. On October 11, 2016, Mr. Goel renewed Soney FM, LLC's Missouri certificate of authority using the Board's online renewal system. One of the items in the online renewal process asks the licensee to indicate agreement with the following statement: "In any other licensing jurisdiction, my corporation has not been the subject of disciplinary action, or entered into any type of settlement agreement, providing for any limitation on the corporation's ability to practice, or monetary penalty or payment of costs that I have not previously disclosed to this Board." Mr. Goel selected a box indicating his agreement with the statement as to Soney FM, LLC. Therefore, Mr. Goel did not reveal the Ohio discipline either in or prior to his online renewal of Soney FM, LLC's Missouri certificate of authority.

Cause for Discipline: The Board had cause for disciplining Mr. Goel's professional engineering license because of his failure to reveal discipline against Soney FM, LLC's certificate of authority in Ohio under the terms of Section 327.441.2(3), RSMo, which allows for discipline for false statements in securing any license or certificate of authority issued pursuant to Chapter 327, RSMo. The Board had cause for disciplining Soney FM, LLC's engineering corporate certificate of authority under Section 327.441.2(8), RSMo, which allows for discipline of

a license or certificate of authority in another jurisdiction upon grounds for which discipline is authorized in this state. The Board also had cause for disciplining Soney FM, LLC's engineering certificate of authority under Section 327.441.2(6), RSMo, by performing professional engineering services without a certificate of authority.

Board Action: Both parties consented to the entry of record and approval of the Joint Stipulation of Facts, Waiver of Hearings, and Consent Order and to the termination of any further proceedings before the Administrative Hearing Commission. Thereafter, Mr. Goel was placed on probation for a period of six (6) months commencing on September 11, 2017 and ending on March 10, 2018. Soney FM, LLC was placed on probation for a period of six (6) months commencing on September 11, 2017 and ending on March 10, 2018. In addition, Soney FM, LLC was ordered to pay \$500 in civil penalties, which shall be handled in accordance with the provisions of section 7 of article IX of the Missouri Constitution. In determining the amount the Board decided to impose on Soney FM, LLC, it considered the deterrent affect the penalty would have, the circumstances that led to the violations, the severity of the violation and risk to the public, the economic benefits gained by Soney FM, LLC, and the interests to the public. Within 60 days of the date of the Order, Soney FM, LLC shall issue a cashier's check or money order in the amount of \$500 made payable to Eric Peters, Cole County Treasurer, Cole County, Missouri, for payment to the county school fund. Through counsel, Mr. Goel paid the \$500 civil penalty to the Treasurer for Cole County.

PROBATED LICENSE AND CIVIL PENALTY

BLEW & ASSOCIATES, P.C., E-2017018509

Fayetteville, Arkansas

Summary: On January 23, 2017, Blew & Associates, P.C. filed an application for certificate of authority for a Foreign For-Profit Corporation with the Secretary of State of Missouri, in which it listed as its specific purpose "land surveying and civil engineering." By stating in its application that it provides "civil engineering," Blew & Associates, P.C. held itself out as willing and able to render services defined a professional engineering, which under the terms of Section 327.181.1, RSMo, constitutes the practice of professional engineering in Missouri, in violation of Section 327.191, RSMo. Thereafter, on June 6, 2017, Blew & Associates, P.C. filed an application with the Missouri Board for a certificate of authority to provide professional engineering services in the state of Missouri.

Cause for Discipline: Cause exists for the Board to deny Blew & Associates, P.C.'s application for an engineering certificate of authority pursuant to Section 327.441.2(6), RSMo, by violation of, or assisting or enabling any person to violate, any provision of this chapter, or of any lawful rule or regulation adopted pursuant to this chapter; and, Section 327.441.2(10), RSMo, by assisting or enabling any person to practice or offer to practice any profession licensed or regulated by this chapter who is not licensed and currently eligible to practice pursuant to this chapter.

Board Action: In lieu of denial of Blew & Associates, P.C.'s application for an engineering certificate of authority, the Board authorized a probated license to be issued to Blew & Associates, P.C. Thereafter on June 8, 2017, the Board issued an Order to Blew & Associates, P.C. to

pay \$500 in civil penalties, which shall be handled in accordance with the provisions of section 7 of article IX of the Missouri Constitution. In determining the amount the Board decided to impose on Blew & Associates, P.C., it considered the deterrent affect the penalty would have, the circumstances that led to the violations, the severity of the violation and risk to the public, the economic benefits gained by Blew & Associates, P.C., and the interests to the public. Within 60 days of the date of the Order, Blew & Associates, P.C. shall issue a cashier's check or money order in the amount of \$500 made payable to Treasurer of Pettis County, Missouri, Attn: Kim Lyne, Pettis County Treasurer, Pettis County, Missouri, for payment to the county school fund. Upon payment of the civil penalties, the engineering certificate of authority shall be considered in good standing. On or about August 22, 2017, the Board received a cashier's check in the amount of \$500 for the civil penalties from Blew & Associates, P.A. On August 24, 2017, the Board mailed the \$500 money order to Kim Lyne, Treasurer of Pettis County, Missouri, for payment to the county school fund. Blew & Associates, P.A.'s engineering certificate of authority, number E-2017018509 is now considered in good standing.

BLEW & ASSOCIATES, P.C., LS-2017018510

Fayetteville, Arkansas

Summary: On January 23, 2017, Blew & Associates, P.C. filed an application for certificate of authority for a Foreign For-Profit Corporation with the Secretary of State of Missouri, in which it listed as its specific purpose "land surveying and civil engineering." By stating in its application that it provides "land surveying," Blew & Associates, P.C. held itself out as willing and able to render services defined as professional land surveying, which under the terms of Section 327.272.1, RSMo, constitutes the practice of professional land surveying in Missouri. Buckley Blew, PLS-2015000225, president of Blew & Associates, P.C. performed an ALTA/ACSM Land Title Survey on a property at 700 South Massachusetts Avenue, Sedalia, Pettis County, Missouri, which listed in the title block that the survey was prepared by Blew & Associates, P.C., which did not hold a certificate of authority to perform professional land surveying in Missouri, in violation of Section 327.281, RSMo. Thereafter, on June 6, 2017, Blew & Associates, P.C. filed an application with the Missouri Board for a certificate of authority to provide professional land surveying services in the state of Missouri.

Cause for Discipline: Cause exists for the Board to deny Blew & Associates, P.C.'s application for a land surveying certificate of authority pursuant to Section 327.441.2(6), RSMo, by violation of, or assisting or enabling any person to violate, any provision of this chapter, or of any lawful rule or regulation adopted pursuant to this chapter; and, Section 327.441.2(10), RSMo, by assisting or enabling any person to practice or offer to practice any profession licensed or regulated by this chapter who is not licensed and currently eligible to practice pursuant to this chapter.

Board Action: In lieu of denial of Blew & Associates, P.C.'s application for a land surveying certificate of authority, the Board authorized a probated license to be issued to Blew & Associates, P.C. Thereafter on June 8, 2017, the Board issued an Order to Blew & Associates, P.C. to pay \$500 in civil penalties, which shall be handled in accordance with the provisions of section 7 of article IX of the Missouri Constitution. In determining the amount the Board decided to impose on Blew & Associates, P.C., it considered the deterrent affect the penalty would

have, the circumstances that led to the violations, the severity of the violation and risk to the public, the economic benefits gained by Blew & Associates, P.C., and the interests to the public. Within 60 days of the date of the Order, Blew & Associates, P.C. shall issue a cashier's check or money order in the amount of \$500 made payable to Treasurer of Pettis County, Missouri, Attn: Kim Lyne, Pettis County Treasurer, Pettis County, Missouri, for payment to the county school fund. Upon payment of the civil penalties, the land surveying certificate of authority shall be considered in good standing. On or about August 22, 2017, the Board received a cashier's check in the amount of \$500 for the civil penalties from Blew & Associates, P.A. On August 24, 2017, the Board mailed the \$500 money order to Kim Lyne, Treasurer of Pettis County, Missouri, for payment to the county school fund. Blew & Associates, P.A.'s land surveying certificate of authority, number LS-2017018510 is now considered in good standing.

ROOFING CONSULTANTS LIMITED, E-2017029104

Waukesha, Wisconsin

Summary: The Board received information that from at least March 27, 2012 until August 2, 2017, Roofing Consultants Limited offered and provided professional engineering services without having renewed its corporate certificate of authority from the Board to offer or provide such services. Roofing Consultants Limited was created as a foreign business registered with the Missouri Secretary of State on October 31, 2002. Roofing Consultants Limited holds a certificate of authority as an architectural corporation number A-2003000841, issued by the Board on January 13, 2003, which is current and active. According to Roofing Consultants Limited's website, www.RCLeng.com, RCL Engineering Group is a business unit of Roofing Consultants Limited specializing in forensic and structural engineering and that they have licensed Professional Engineers on staff. According to Missouri Secretary of State, RCL Engineering Group was formed on March 27, 2012, with Roofing Consultants Limited listed as the owner. By its ownership of RCL Engineering Group, and by stating on its website that it specializes in forensic and structural engineering and that it has licensed Professional Engineers on staff, Roofing Consultants Limited offered to provide professional engineering services in the state of Missouri, which constitutes the practice of professional engineering in Missouri. Douglas W. Ernst, a member of Roofing Consultants Limited, is licensed in Missouri as a Professional Engineer. On April 27, 2017, Mr. Ernst signed and attached his professional engineer's seal to a Roof Investigation Report prepared by an unlicensed employee of Roofing Consultants Limited, on the property for a client in Camdenton, Camden County, Missouri, for submission to Auto Owners Insurance Company in connection with an insurance claim. The Roof Investigation Report was on the letterhead of Roofing Consultants Limited, and contained the legend, "Engineers, Architects, and Building Envelope Specialists." The Roofing Investigation Report on its face offered to perform professional engineering, and by signing and sealing the document with his professional engineer's seal, Mr. Ernst confirmed that the preparation of the report constituted professional engineering.

Cause for Discipline: Cause exists for the Board to deny Roofing Consultants Limited's application for an engineering certificate of authority pursuant to Section 327.441.2(6), RSMo, by violation of, or assisting or enabling any person to violate, any provision of this chapter, or of any lawful rule or regulation adopted pursuant to this chapter; and, Section 327.441.2(10), RSMo, by assisting or enabling any person to practice or

offer to practice any profession licensed or regulated by this chapter who is not licensed and currently eligible to practice pursuant to this chapter.

Board Action: In lieu of denial of Roofing Consultants Limited's application for an engineering certificate of authority, the Board authorized a probated license to be issued to Roofing Consultants Limited. Thereafter on August 11, 2017, the Board issued an Order to Roofing Consultants Limited to pay \$500 in civil penalties, which shall be handled in accordance with the provisions of section 7 of article IX of the Missouri Constitution. In determining the amount the Board decided to impose on Roofing Consultants Limited, it considered the deterrent affect the penalty would have, the circumstances that led to the violations, the severity of the violation and risk to the public, the economic benefits gained by Roofing Consultants Limited, and the interests to the public. Within 60 days of the date of the Order, Roofing Consultants Limited shall issue a cashier's check or money order in the amount of \$500 made payable to Elaine Gilley, Treasurer of Camden County, Missouri, for payment to the county school fund. Upon payment of the civil penalties, the engineering certificate of authority shall be considered in good standing. On or about August 16, 2017, the Board received a cashier's check in the amount of \$500 for the civil penalties from Roofing Consultants Limited. On August 17, 2017, the Board mailed the \$500 cashier's check to the Ms. Elaine Gilley, Camden County Treasurer, Camdenton, Missouri. Roofing Consultants Limited's engineering corporate certificate of authority, number E-2017029104, is now considered in good standing.

STERLING BARNETT LITTLE, INC., A2017029216

Arlington, Texas

Summary: Sterling Barnett Little, Inc. is a Texas corporation which registered with the Missouri Secretary of State as a foreign corporation doing business in Missouri on October 21, 2008. In 2009, Sterling Barnett Little, Inc. completed architectural work on a clinic renovation project for Missouri Urologists Cancer Center in Columbia, Boone County, Missouri. In 2014, Sterling Barnett Little, Inc. performed a cost study for a client on a pharmacy upgrade. On June 30, 2016, Mr. Little, President of Sterling Barnett Little, Inc., signed a consent agreement with the North Carolina Board of Architecture, acknowledging that he had performed architectural services through the company in the state while the company was not registered to perform such services, and paid a civil penalty of \$2,500 plus costs and late fees. Mr. Little did not report the North Carolina discipline when he renewed his Missouri architect's license in December 2016. On April 11, 2017, Sterling Barnett Little, Inc. filed an application with the Missouri Bard for a certificate of authority as an architectural corporation in the state of Missouri.

Cause for Discipline: Cause exists for the Board to deny Sterling Barnett Little, Inc.'s application for an architectural certificate of authority pursuant to Section 327.441.2(3), RSMo, by use of fraud, deception, misrepresentation or bribery in securing any license or certificate of authority issued pursuant to this chapter or in obtaining permission to take any examination given or required pursuant to this chapter; Section 327.441.2(6), RSMo, by violation of, or assisting or enabling any person to violate, any provision of this chapter, or of any lawful rule or regulation adopted pursuant to this chapter; Section 327.441.2(8), RSMo, by disciplinary action against the holder of a license or a certificate of authority, or other right to practice any profession regulated by this chapter granted by another state, territory, federal agency or country upon grounds for which revocation or suspension is authorized in this state; and, Section 327.441.2(10), RSMo, by assisting or enabling any person to practice or

offer to practice any profession licensed or regulated by this chapter who is not licensed and currently eligible to practice pursuant to this chapter.

Board Action: In lieu of denial of Sterling Barnett Little, Inc.'s application for an architectural certificate of authority, the Board authorized a probated license to be issued to Sterling Barnett Little, Inc. Thereafter on August 11, 2017, the Board issued an Order to Sterling Barnett Little, Inc. to pay \$500 in civil penalties, which shall be handled in accordance with the provisions of section 7 of article IX of the Missouri Constitution. In determining the amount the Board decided to impose on Sterling Barnett Little, Inc., it considered the deterrent affect the penalty would have, the circumstances that led to the violations, the severity of the violation and risk to the public, the economic benefits gained by Sterling Barnett Little, Inc., and the interests to the public. Within 60 days of the date of the Order, Sterling Barnett Little, Inc. shall issue a cashier's check or money order in the amount of \$500 made payable to Tom Darrough, Boone County Treasurer, Boone County, Missouri, for payment to the county school fund. Upon payment of the civil penalties, the engineering certificate of authority shall be considered in good standing. On or about August 22, 2017, the Board received a cashier's check in the amount of \$500 for the civil penalties from Sterling Barnett Little, Inc. On August 24, 2017, the Board mailed the \$500 money order to Tom Darrough, Treasurer of Boone County, Missouri, for payment to the county school fund. Sterling Barnett Little, Inc.'s architectural certificate of authority, number A-2017029216 is now considered in good standing.

CIVIL PENALTY

LEE MECHANICAL CONTRACTORS, INC. (NOT LICENSED)

Park Hills, Missouri

Summary: The Board received information that in June 2005, Ernest Gibson, on behalf of Lee Mechanical Contractors, requested that an engineering and architectural firm located in Farmington, Missouri, design a set of apartments to be called the Falcon Street Apartment for construction in Park Hills, Missouri. The firm, through its staff architect, created a design for buildings with two floors consisting of four apartment units each, plans for which were provided to Ernest Gibson and Lee Mechanical Contractors. The Falcon Street project was designed to comply with the Building Officials and Code Administrations (BOCA) Code, 1996 version, which was the applicable building code at the time. On November 23, 2015, Gale Grounds of Lee Mechanical Contractors contacted the firm to request a proposal to update the Falcon Street design for a new project to be built on Donnelly Street in the City of Leadington, Missouri. On November 25, 2015, the firm emailed a proposal to Mr. Grounds which stated that the design would be updated to meet BOCA Code, 2012 version, which was then required by the City of Leadington. Lee Mechanical Contractors did not engage the firm or any other licensed architect or professional engineer to design the Donnelly Street project. Instead, at the direction of Nick Gibson, chief operating officer, Lee Mechanical Contractors copied the plans the firm provided for the Falcon Street project, removed the firm's border and title block, and cut and pasted information to adapt the Falcon Street plans to create plans for the Donnelly Street project. Nick Gibson submitted the altered plans to the City of Leadington, which issued a building permit. With the knowledge of Nick Gibson, the revised plans were sent to India to be redrawn to scale. The firm was not informed of the copying of its plans and did not update, agree to, or approve the use of the plans for a different

project. Construction on the Donnelly Street unit was underway, using the plans Nick Gibson created by copying and altering plans the firm provided for the Falcon Street project. The Donnelly Street plans, designed for compliance with the 1996 version of the BOCA Code, were not updated to comply with the 2012 BOCA Code currently in effect and are out of date, were not been updated to comply with accessibility requirements, and were not created with the specific site in mind. The Donnelly Street plans also did not incorporate changes the firm made to the Falcon Street plans to comply with city review. No architect or professional engineer drafted, reviewed, approved, signed, or sealed the Donnelly Street construction plans. The Donnelly Street plans contained detail and design constituting the practice of architecture as defined in Section 327.091, RSMo. The Donnelly Street project contains 24 apartment units designed to house 24 families, well in excess of the two family dwelling units which may be designed by one not licensed as an architect under the terms of Section 327.101.5(b), RSMo. The Donnelly Street project consists of four units, each with two floors of ranging from 6,564 to 10,042 square feet, greatly exceeding the 2000 square foot maximum that may be designed by a person who is not a licensed architect under the terms of Section 327.101.5(d), RSMo.

Cause for Discipline: By preparing, submitting for approval, and engaging in construction based on plans containing content which may only be prepared by a licensed architect, Lee Mechanical Contractors engaged in the unlicensed practice of architecture in violation of Section 327.101, RSMo, which conduct may be enjoined under the terms of Section 327.075, RSMo. The Donnelly Street plans contain detailed foundation and structural detail which constitutes the practice of professional engineering. By preparing, submitting for approval, and engaging in construction based on plans containing content which may only be prepared by a licensed professional engineer, Lee Mechanical Contractors engaged in the unlicensed practice of professional engineering in violation of Section 327.191, RSMo, which conduct may be enjoined under the terms of Section 327.075, RSMo.

Board Action: The Board authorized its Litigation Counsel to proceed with settlement. Thereafter, on July 18, 2017, Lee Mechanical Contractors, Inc. entered into a Settlement Agreement with the Missouri Board for Architects, Professional Engineers, Professional Land Surveyors, and Professional Landscape Architects. In the Settlement Agreement, Lee Mechanical Contractors, Inc. agreed to pay \$5,000 in civil penalties, which shall be handled in accordance with the provisions of section 7 of article IX of the Missouri Constitution. In determining the amount the Board decided to impose on Lee Mechanical Contractors, Inc., it considered the deterrent affect the penalty would have, the circumstances that led to the violations, the severity of the violation and risk to the public, the economic benefits gained by Lee Mechanical Contractors, Inc., and the interests to the public. Within 60 days of the date of the Order, Lee Mechanical Contractors, Inc. shall issue a cashier's check or money order in the amount of \$5,000 made payable to Kerry Glore, the St. Francois County Treasurer, St. Francois County, Missouri, for payment to the county school fund. As a part of the Settlement Agreement, Lee Mechanical Contractors, Inc. will provide the Board with the following information regarding the Donnelly Street project: a) A copy of revised building plans signed and sealed by Missouri-licensed architects and professional engineers, as appropriate; b) A list of all changes made to the building plans in the process of review by licensed architects and professional engineers; and, c) A copy of a certificate of substantial completion prepared by a Board-licensed architect, certifying that construction has been completed in accordance with the signed and sealed plans. In addition,

Lee Mechanical Contractors, Inc. shall cease and desist the performance of all architectural and/or professional engineering activity and advertisement of any self-performed architectural and/or professional engineering activity until such time as Lee Mechanical Contractors, Inc. obtains a certificate of authority to practice architecture and/or professional engineering from the Board. On or about July 24, 2017, the Board received a cashier's check in the amount of \$5,000 for the civil penalties from Lee Mechanical Contractors, Inc. On July 24, 2017, the Board mailed the \$5,000 cashier's check to Kerry Glore, the St. Francois County Treasurer, St. Francois County, Missouri, for payment to the county school fund. A licensed architect prepared and sealed final plans and certified that the project was completed in compliance with applicable standards.

HOUSE BILL 600 SUSPENSIONS

ERD, ANDREW L., A-2016033870

Glendale, Missouri

Summary and Board Action: Mr. Erd's architectural license was suspended pursuant to Section 324.010, RSMo, on September 3, 2017.

GABERT, MARK A., PLS-2002000248

Golden, Colorado

Summary and Board Action: Mr. Gabert's professional land surveyor license was suspended pursuant to Section 324.010, RSMo, on September 3, 2017.

GROTHER, THOMAS J., PE-19840
